

GO GREEN AND SAVE ON THERMO KING PRODUCTS WITH THE CORE INCENTIVE PROGRAM

What is CORE?

The California Air Resources Board (CARB), in partnership with CALSTART, launched the Clean Off-Road Equipment Voucher Incentive Project (CORE) to accelerate the purchase of zero-emission off-road equipment in California by helping to offset the higher cost of zero-emission technology with a point-of-sale discount.

Thermo King offers top of the line fully electric refrigeration units for both small and large vehicle usage.

ELIGIBLE THERMO KING PRODUCTS

e200

A fully integrated plug and play solution that supports increased vehicle uptime, power source optimization, and enhanced temperature control.
Suitable for Class 1-3 Trucks and Vans.
Base voucher amount: \$5,633

e1000

Performance and capacity matching of leading non-electric units, while offering increased reliability, lower weight, and reduced noise.
Suitable for Class 5-7 Trucks.
Base voucher amount: \$32,000

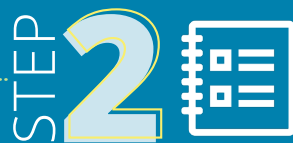

HOW TO PARTICIPATE

Eligibility requirements: Any California user of CORE certified TRUs is eligible for the rebate. Equipment you purchase from Thermo King must be domiciled and operated for at least three years in California after the voucher redemption date. Equipment users must also submit activity reports for three years.

SUBMIT A VOUCHER REQUEST

Select which eligible Thermo King unit best fits your needs from the [equipment catalog](#).

Contact the CORE certified Thermo King dealer in your area and they will assist in submitting the necessary paperwork for the unit you are purchasing.

Your Thermo King dealer will work directly with the CORE Voucher Processing Center (VPC) on our behalf to secure the incentive discount.

Once the submission has been approved, your Thermo King dealer will credit the incentive amount directly to your point of sale purchase.
