

When it comes to shipping temperature sensitive cargo by sea and land, protection means everything.

Protection that begins the moment your cargo gets loaded...

Delivering you value x3

①

TRUSTED RELIABILITY

and being confident that any load will arrive in the same condition as when you sent it

②

POWERED CONSISTENCY

knowing you can set a precise temperature (anywhere down to -70°C) and trust the container to keep it there

③

COLD CHAIN INTEGRITY

dependable power, across land and sea, with no deviation in the set temperature

THERMO KING – FOR THE JOURNEY AHEAD

Thermo King is the world leader in transport temperature control systems, with a wide range of solutions spanning road, rail, and marine. For shippers moving frozen cargo by sea, we are the only manufacturer that can offer premium cooling capacity and precise temperature control all the way down to -70°C.
