

GENUINE BELTS

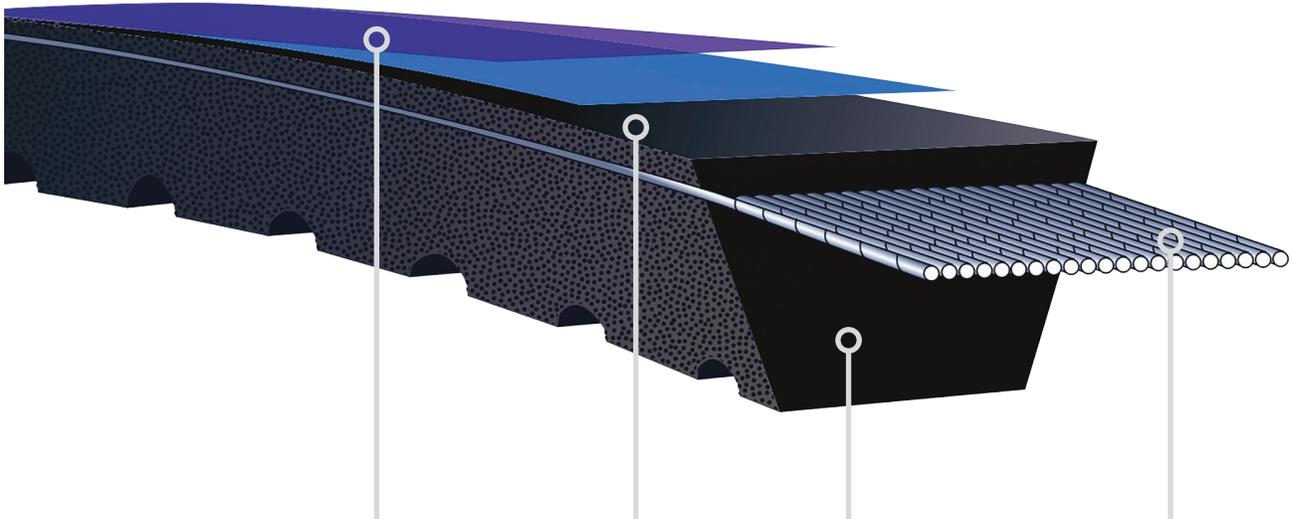

Constructed from premium materials to deliver longer life and greater reliability.

IT'S WHAT'S INSIDE THAT COUNTS—MATERIALS MATTER

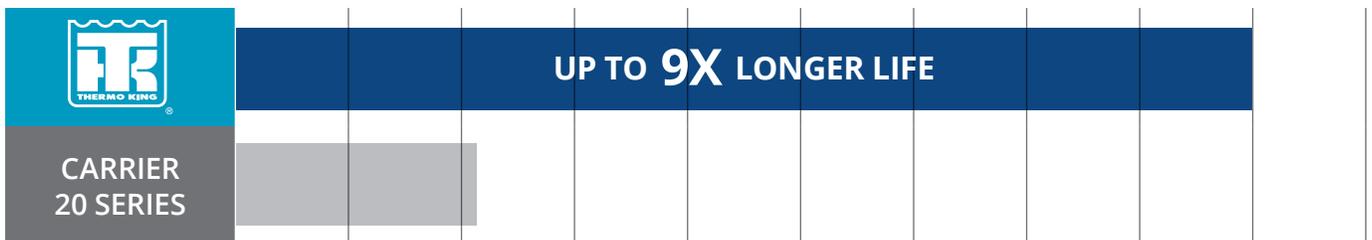

Built with premium materials for superior temperature and chemical resistance.

	TOP FABRIC	INSULATION	CUSHION	TENSILE
	Tough oil/abrasion-resistant fabric for maximum flexibility and strength	Highest grade heat/oil-resistant compound to hold tensile cord in place	High-quality neoprene to resist heat and oil	Uses strongest cord material with Kevlar or polyester to resist stretching
COMPETITIVE	Low-grade top fabric materials to drive down costs	Less material and lower grade compound	Uses mostly clay and filler	Low-gauge cord and materials like nylon that easily stretch and unwind

BELT LIFESPAN TESTING

THERMO KING EDGE: Longer life than competitive belts.*

* Based on accelerated manufacturer life testing on Thermo King part #78-603 versus competitive belts offered as equivalents.
