Date:	December 4, 2025
Subject:	TracKing® December Release Notes
Location:	e-Tech Library

Products:	TracKing.com, TracKing Pro
Description:	December release notes for the TracKing website are listed below.

TracKing Updates:

1. Extend Keep Me Signed In (KMSI) Duration from 24 Hours to 7 Days.

    - Users will not be prompted to log in again within a 7-day period if KMSI is selected during login.

    - If the user selects the log out option, the application will follow the Multi-Factor Authentication (MFA) process again.

    - Users will be notified of the extended sign-in duration upon successful login.

2. Email Notification on New Unit Activation and Displaying External ID (Available for TracKing portal and TKConnect App).

    - Sends an email notification to a specified email address upon new unit activation.

    - Text box for email input with format validation.

    - Checks if the email is part of the customer's account and active. If not, sends notification to the customer admin. This field is optional.

    - External ID is now visible on the unit activation screen, edit vehicle screen, and transfer screen.

TracKing Fixes:

1. Odometer Data Value in TracKing List page.

    - Existing Behavior: The odometer value was not displayed on the TracKing List page.

    - New Behavior: The odometer value is now available and displaying on the TracKing List page.

Best regards,

Telematics Support Team
