

Date: June 19, 2025
Subject: TrackKing® June 2025 Release Notes
Location: e-Tech Library

Product: TrackKing.com, TrackKing Pro

Description: June 2025 release notes for the TrackKing website are listed below.

TrackKing Enhancements:

- Inactive/deactivated units are displayed in lease assist screen
 - Existing Behavior: Inactive/deactivated units are displayed in lease assist screen.
 - New Behavior: Inactive/deactivated units should not be displayed in lease assist screen.

Customer Issues-TrackKing

- Not receiving reports via mail in CSV format when non-English is chosen
 - Existing Behavior: CSV reports were not received via email when Spanish or Portuguese was selected.
 - New Behavior: Reports are now successfully delivered in CSV format in **English only**, regardless of language preference.
- Reefer Utilization report - Data Mismatch.
 - Existing Behavior: While pulling long run reports for Reefer utilization Reports showed negative values; Reefer ON/OFF times did not match the expected duration.
 - New Behavior: Reports now reflect accurate and consistent data.

- Temperature Chart Report – Invalid Date Error

- Existing Behavior: Generating a report with the same start and end date but different times triggered an error.
- New Behavior: Reports can now be generated for the same date with different time range.

- Temputrak Power Status Display Issue

- Existing Behavior: Temputrak Power status displayed as OFF in TrackKing, though the unit was ON.
- New Behavior: Temputrak Power status now correctly reflects ON when the unit is ON.

- Engine Hour Reporting issue

- Existing Behavior: Report displayed data for multiple customers under the Dealer even when a single customer was selected.
- New Behavior: Engine hour reports now accurately display data only for the selected customers.
