

Date: May 15, 2025
Subject: TrackKing® May 2025 Release Notes
Location: e-Tech Library

Product: TrackKing.com, TrackKing Pro

Description: May 2025 release notes for the TrackKing website are listed below.

TrackKing Enhancements:

- Pagination footer details are not displayed in tracking list when KMSI (Keep Me Signed In) / password expiry message are displayed on top.
 - Existing Behavior: When a new customer account is created, the customer admin has both 'Admin' and 'Run Batch Commands' user feature type access selection.
 - New Behavior: When a new customer account is created, the customer admin does not have 'Run Batch Commands' selected.
- Choosing 2-way commands for a unit on the TrackKing website using mobile, the commands dropdown menu is absent.
 - Existing Behavior: Using mobile when the user opens the TrackKing website on the browser and selects 2-way commands for a unit, the commands drop down is missing.
 - New Behavior: Using mobile when the user opens the TrackKing website on the browser and selects 2-way commands for a unit, the commands dropdown should display.
- Vehicle details cannot be exported from the TrackKing list page.
 - Existing Behavior: When a user selects the Export option on the TrackKing page to get an Excel report of the TrackKing list, the report is not downloaded, and the website continues to load.
 - New Behavior: The TrackKing list Excel report can be downloaded when the user selects the Export option on the TrackKing page.

- T8 Alarm (Data Delay) - TK BlueBox and TKV5.
 - Existing Behavior: Units were not being activated when a customer replaced the TK BlueBox that had an active embedded SIM with a TKV5.
 - New Behavior: Units will be activated when the TK Bluebox is replaced with a TKV5, regardless of the active embedded SIM.

Best regards,

Telematics Support Team
