

PORTABLE TRANSPORT CONTAINERS

Flexible, portable cooling, freezing and heating containers.

Coldtainer® from Thermo King

PORTABLE STORAGE SOLUTIONS

A flexible and economical solution for temperature-controlled transport needs.

We offer several mobile storage units that can safely transport temperature-sensitive products in any environmental condition. In the pharma industry, they can become a blood transport cooler or portable vaccine refrigerator. For food delivery, they can keep pre-cooked meals hot or groceries cold.

These containers are also a less expensive alternative to a refrigeration conversion of a truck or van. They do not require a van liner install or a refrigerated van build. They are easy to load and unload, allowing the unit to be removed from the vehicle, and come in convenient front opening or top loading models.

Bluetooth Added for Total Connectivity and Visibility

All Coldtainer from Thermo King containers can be equipped with Bluetooth connectivity and accessed by a downloadable APP allowing you to monitor the unit from a linked smartphone or tablet and upload reports and temperature graphs.

- Turns your mobile device into a wireless user interface.
- Precise temperature set-point control.
- Easy viewing of temperature and status without opening container.

EASY INSTALLATION

Coldtainer from Thermo King containers are a one-piece molded polyethylene construction for outstanding durability, strength and lightness. Components are designed and tested for use in mobile applications.

FLEXIBLE USE FOR FOOD DELIVERY

Coldtainer from Thermo King containers are the perfect solution for food transport, whether you need to keep your items cool, frozen or heated.

The flexible design is an economical alternative to traditional refrigerated transport solutions or for mixed temperature transport.

Used by small food producers, catering companies, food distributors, home delivery services, vending machines replenishment companies, and emergency services to safely store and transport product at a precise temps.

- Variety of sizes to fit your business need.
- Powerful cooling, freezing and heating capability (-11°F to 104°F).
- Food-grade materials used throughout for hygienic operation and easy cleaning.
- Precise digital display for easy viewing of temperature and status without opening container.

MODEL #F0720 WITH OPTIONAL SHELF

RELIABLE PHARMACEUTICAL TRANSPORT

Coldtainer from Thermo King containers are designed to meet the stringent temperature control requirements for pharmaceutical transport.

The heating and cooling functions allow for more precise temperature control within the cargo space, regardless of outside ambient conditions. The extended temperature range means more flexibility in the transport services offered.

Extensive performance testing includes thermal mapping to ensure that each container can perform to the highest standards in all conditions.

Constructed from materials proven to be safe for pharmaceutical transport.

- Integrated battery and battery charger, for autonomous operation without any connection to other power sources.
- Maintains consistent temperature with smooth air flow distribution evenly throughout the cargo (operates at +/- 2°C).
- Safe transport of biomedical products, like vaccines, blood bags and blood tubes, biological samples, in the most demanding environmental conditions.
- Ideal for distribution hub centers from pharmacies/wholesalers direct to patients.

OPTIONAL UPGRADES

We offer a wide range of upgrades to cater for different applications.

1 Shelf

- Adjustable to suit the contents of your load
- 66 lbs capacity per shelf
 - Available for all sizes except top loaders
 - Can support Gastronorm containers

2 Transport Kits

- Trolley: Provides ease of mobility
Pallet base: Allows for easier loading into truck or van

3 Bluetooth Module

- Load temperature conveniently monitored on your mobile device
- Available for all units

4 Plastic Strip Curtain

- Reduce cold air leakage when door is open

5 Fixing Kit/Tie Down Kit

- Easily secures unit to vehicle floor

6 Internal Fan Kit

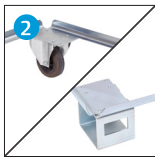

- Ensures optimal ventilation inside the Coldtainer from Thermo King for load protection

7 AC/DC Converter

- Optional AC/DC converter to connect the Coldtainer from Thermo King to an AC power source

8 Handle Lock Kit

- To stack the Coldtainer from Thermo King containers

Thermo King – by Trane Technologies (NYSE: TT), a global climate innovator – is a worldwide leader in sustainable transport temperature control solutions. Thermo King has been providing transport temperature control solutions for a variety of applications, including trailers, truck bodies, buses, air, shipboard containers and railway cars since 1938. For more information, visit thermoking.com or tranetechnologies.com.
